

Recreate The Wrekin

Our everyday objects can fuel our imagination when we creatively use them in a different way

Inspired by the local hilltop, design a structure using household materials and invent what's at the top!

5. What kind of hill is it?

Does it have trees?
Can you walk up it?
How high is it?
What's the weather like up there?

1. You will need:

Lots of different household objects that can be safely stacked on top of each other

Raid your recycling bin
Choose objects for their shape and structure
Choose objects for their texture too

4. Balance

Use smaller objects to add details
Build your structure as high or as decorative as you can

2. Don't choose objects that will break easily!

3. Build

Arrange your objects to make your hill
Start with a good foundation and create strong shapes for stability
